Dear Parents and Guardians,

This correspondence is for all yearbook staff / class members. We are fortunate to have at our disposal some state of the art equipment. Students will, through the course of this year have the opportunity work with our digital SLR cameras. Some of this work will be done during class. However, there is opportunity for students to check out camera's to report on the school campus and various assignments including spirit week and other events. It is highly beneficial to the students work an yearbook as a whole if students utilize the cameras outside of class time.

Do to their cost we would like for you to be informed that your student may be working with this equipment but must also ask for your permission to check these items out to your student. The digital SLR camera kits retail for close to \$700.00 with some lenses that cost \$450.00.

Your signature below acknowledges that you are aware that your student is taking responsibility for this equipment when following check out procedures and that loss or damage will be addressed by that student and their guardian. If you do not wish for you student to take these opportunities please leave me a note on the lines provide.

Thank You,
Mr. Hungerford

Digital Camera

The undersigned has been informed of the students responsibility and agrees that the student may check these tools out for use outside for yearbook development and to complete projects. The student and guardian understands and accepts financial responsibility for the safety and care of all equipment in their care.
